## PROJECTS

<!--StartFragment-->

#### React Native Social Media App

This social media app is built using React Native, leveraging its cross-platform capabilities to deliver a seamless experience on both iOS and Android. The app provides users with an intuitive interface for content sharing, real-time interactions, and community engagement.

#### Key Features:

- User Profiles – Create and customize profiles with bios, photos, and personal details.
- Content Sharing – Post text, images, videos, and stories with engagement features like likes, comments, and shares
- Monetization Options – Ads, subscriptions, or in-app purchases for revenue generation.

#### Tech Stack:

- Frontend: React Native (Expo or CLI), TypeScript/JavaScript
- Backend: Firebase, Node.js, or Django (based on preference)
- State Management: Redux, Zustand
- This app is designed to be scalable, secure, and high-performing, ensuring a smooth social experience for users across all devices.

#### SKILLS

- |                |                |        |
|----------------|----------------|--------|
| • Unity Engine | • C#           | • Java |
| • Android      | • HTML         | • CSS  |
| • JavaScript   | • React Native |        |

#### EXTRA CURRICULAR ACTIVITIES

- Participated in inter-college hackathons focused on mobile app development.
- Volunteered in organizing coding workshops and technical seminars at college.
- Member of the college photography club, participating in exhibitions and competitions.
- Contributed to student tech clubs by assisting in mobile app projects.

#### ADDITIONAL DETAILS

- Familiar with cross-platform mobile development using React Native and JavaScript. Experience with Android Studio, Git, and basic API integration. Passionate about photography and creative design.
